IMPORTANT INFORMATION

ADDITIONAL INSURANCE/ ASSISTANCE COVERAGE OPTIONS

The FFS has negotiated with Verspieren, its insurance broker, the optional coverage offered to license holders and described in this Information Notice. Each license holder may subscribe to one of these options by choosing the most extensive coverage desired for the risk of bodily injury that the license holder may be exposed to while performing his/her sport. In addition to the Information Notice, license holders may review the general conditions on the FFS website www.ffs.fr or on its insurance broker's site www.ffs.verspieren.com.

Our insurance broker Verspieren can provide more comprehensive insurance and assistance coverage than the policies offered by the Club upon membership.

REGULATIONS

HEALTH QUESTIONNAIRE AND MEDICAL CERTIFICATE

- For registered members under age (on the date the licence is taken out):

Obtaining or renewing a Carte Neige licence (all types of licence) is subject to the joint completion of a health questionnaire (questionnaire concerning the underage athlete's state of health, available on the federal website) by the minor and the person(s) exercising parental authority. The person(s) exercising parental authority must certify that each section of the questionnaire has been answered in the negative. Otherwise they must produce a medical certificate less than 6 months old certifying that there are no contraindications to the practice of the sport or discipline concerned.

- For registered members of age (on the date the licence is taken out):

For COMPETITION licences: Obtaining or renewing a COMPETITION Carte Neige licence requires the completion of a health questionnaire (questionnaire concerning the state of health of the athlete of age, available on the federal website). The COMPETITION registered member certifies that each section of the questionnaire is answered in the negative. Otherwise, they must produce a medical certificate less than 6 months old certifying that there are no contraindications to the practice of the sport or discipline concerned in competitions.

With "LOISIR" or "DIRIGEANT" licences: Obtaining or renewing a "LOISIR" or "DIRIGEANT" Carte Neige licence is not subject to the presentation of a medical certificate or a health questionnaire*.

- Special case for minor and adult licences practising the biathlon (competition and leisure):

A medical certificate less than one year old is required every year for the biathlon (for competitions if appropriate). The biathlon must be indicated on the medical certificate as a discipline, including for registered members who are learning this sport during the season and have already provided a "health questionnaire" certificate.

**Except with the practice of the biathlon, for which a medical certificate less than one year old must be provided to the club every year.*

FIGHT AGAINST DOPING

Article R.232-52 of the Sports Code

If the athlete being tested is a minor, any sample collection requiring an invasive technique may only be carried out with the written authorisation of the person(s) with parental authority, given at the time of application for or renewal of the licence, in addition to the authorisation of the athlete himself.

If the athlete being tested is a protected adult and the taking of such a sample falls within the categories of acts for which the person concerned benefits from the assistance of the person in charge of their protection under the conditions of article 459 of the Civil Code, the sample may only be taken with written authorisation from this person given under the same conditions.

The absence of an authorisation constitutes the evasion of a sample collection within the meaning of 1° of Article L. 232-9-2.
